Q and A:

- **Please refer to the CDC website:** [Frequently Asked Questions about COVID-19 Vaccination](#)
- **Fact Sheet about the Pfizer Vaccine:** <https://www.fda.gov/media/144414/download>
- **What to Expect after Getting a COVID-19 Vaccine:** [CDC - What to Expect](#)

Can I get the vaccine if I had COVID?

You can get the vaccine even if you have had COVID in the past 90 days. The only time you need to wait the 90 days is if you received passive antibody therapy as a treatment for COVID.

Can I get the vaccine if I am currently quarantining?

You should not get the vaccine if you are currently under a COVID quarantine.

How long does the appointment take?

The appointment may last 30 minutes. Anticipate to wait 15 minutes after you receive your vaccine.

What If I have allergies?

We recommend you consult with your personal physician prior to getting the vaccine.

Can I get the vaccine if I am pregnant or breastfeeding?

We recommend that you consult with your personal physician prior to getting the vaccine.

Do I need to quarantine if I am exposed to someone with COVID-19 after I get my first or second dose of the vaccine?

Yes. At this time, the direction is that all individuals must still quarantine if they are exposed to an individual with COVID-19 even if they had the vaccine.

What are the side effects of the vaccine?

In clinical trials side effects that happen within 7 days of getting vaccinated were common but were mostly **mild to moderate**. However, **a small number of people** had severe side effects that affected their ability to do daily activities.

In the arm where you got the shot:

Pain
Swelling
Redness

Throughout the rest of your body:

Tiredness Headache
Chills Fever
Nausea Muscle Pain

Should I come to school if I have symptoms, can I self-certify?

If you have minor symptoms, students can report to school. If you are in the small group of people who have severe side effects, such as severe fatigue or body aches, you will need call in sick.

Per IDPH, If you have any of the following symptoms you will NOT be able to self-certify, and must stay home and call in sick.

Fever 100.4 or greater	Cough
Shortness of breath	Loss of taste of smell

If your symptoms do not improve and persist for more than 2 days, it is recommended that you seek medical guidance.
